MDRM UTILITY SOLUTION

— Designing the world in motion. —

WHO WE ARE

Powering industries with innovative compressed air & utility solutions.

ABOUT US

MDRM Utility Solution is a trusted name in the field of compressed air and utility solutions. With a focus on innovation, quality, and customer satisfaction, we deliver advanced, reliable, and energy-efficient equipment that ensures seamless performance and maximum productivity across industries.

We are committed to providing **complete air solutions** under one roof – from supply and installation to service and maintenance – helping businesses operate smoothly and efficiently.

OUR VALUES

QUALITY

We deliver products built to the highest standards of quality and reliability.

INNOVATION

We embrace innovation to provide smart and efficient solutions.

INTEGRITY

We believe in honest relationships and transparent business practices.

CUSTOMER FOCUS

Our customers are at the heart of everything we do.

WHY CHOOSE US?

- ✓ Wide range of premium quality products
- ✓ Energy-efficient and cost-effective solutions
- ✓ Expert technical support & after-sales service
- ✓ Timely delivery and installation
- ✓ Tailored solutions to meet industry needs

OUR VISION

To be the most trusted partner in compressed air and utility solutions driving industrial progress and sustainable growth.

OUR MISSION

To deliver innovative, reliable, and energy-efficient solutions with exceptional service, ensuring customer success.

HOW OUR PRODUCTS WORK

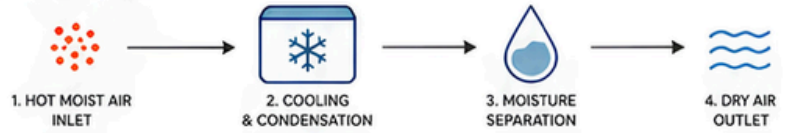

COMPLETE AIR SOLUTIONS.
SEAMLESS PERFORMANCE.

REFRIGERATED AIR DRYER

Moist, hot compressed air enters the dryer where it is cooled using a refrigeration system. The moisture condenses and is separated, providing dry, clean air.

HOW IT WORKS

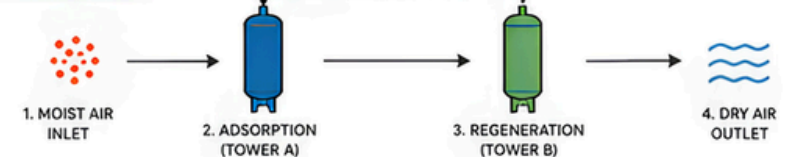

HEATLESS ADSORPTION DRYER

Moist air passes through one tower where desiccant absorbs moisture. The other tower regenerates using a small portion of dry air. Ensures continuous supply of dry air.

HOW IT WORKS

AIR RECEIVER TANK

Stores compressed air to stabilize pressure, reduce fluctuations and cool the air. Condensate settles at the bottom for drain out.

HOW IT WORKS

AIR LINE FILTERS

Removes solid particles, water, oil aerosols and vapor from compressed air to protect equipment and ensure air quality.

HOW IT WORKS

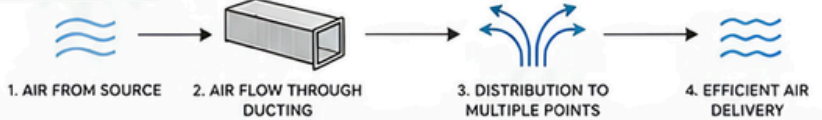

DUCTING

Distributes conditioned air efficiently throughout the system with minimal pressure loss and leakage.

HOW IT WORKS

RECIPROCATING AIR COMPRESSOR

Piston moves back and forth in the cylinder, compressing air. The compressed air is stored in the tank and delivered for use.

HOW IT WORKS

SCREW AIR COMPRESSOR

HITACHI

Two intermeshing helical screws rotate to trap and compress air continuously. It delivers smooth, efficient and reliable performance.

HOW IT WORKS

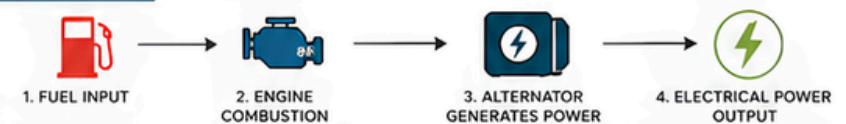

GENSET

Kubota

Diesel engine drives the alternator to generate electricity. Control panel monitors and ensures safe and reliable operation.

HOW IT WORKS

ALUMINIUM AIR PIPE

Lightweight, corrosion-resistant aluminium pipes ensure leak-free and efficient air distribution across the system.

HOW IT WORKS
